Subject: Erasmus+ project (Spain)

Dear Sirs,

First of all, before explaining the purpose of my email, please receive warm greetings.

My name is Copelia Maroto, and I am a teacher at the Isla de la Deva High School, located in Asturias, in the north of Spain. I am reaching out to you with the aim of obtaining assistance in finding companies, associations, and/or educational institutions with which to organize mobilities for students and teachers within the Erasmus+ projects that my school is involved in (KA-120-VET, KA-122-VET, KA-131).

As you know, the Erasmus mobility offers both students and teachers a unique training opportunity, allowing them to learn new methodologies at a professional level, as well as an improvement in communicative and social skills for both students and teachers, and the chance to enjoy the culture of the host country. Our school provides vocational training studies related to the health professional family, including pharmacy technician, nursing assistant, clinical laboratory and biomedical techniques, and pathological anatomy, as well as studies in the electrical professional family (electrotechnical installation technician) and in the installation and maintenance professional family (technician in heat production facilities).

Therefore, I kindly request your assistance in establishing contact with associations, companies, or institutions to facilitate such mobilities. Additionally, we are open to welcoming any interested organization to our school.

Looking forward to your prompt response.

Warm regards,

Copelia Maroto
Teacher at IES Isla de la Deva
Avd. Principal 33, 33450, Piedras Blancas.
