

What makes Digital Education Ecosystem?

Pasi Silander

pasi.silander@oph.fi

TCA seminar

25.9.2024

Riga

Pasi Silander

HEAD OF SALTO DIGITAL

*Educational futurist,
Computer scientist*

History:

*Digitalization strategy and program
in Helsinki City Education Division (2016)
involving 120 schools.*

Head of ICT-development programs

- AI in Education
- Learning Analytics
- Smart School

*Author and editor of nonfiction books,
researcher in education and edtech
lecturer, teacher educator.*

SALTO Digital Resource Centre

Knowledge Hub between Policy and Practice

- Supports implementation of the digital dimension as an overarching priority in the **Erasmus+** and **European Solidarity Corps Programmes**
- Focuses on raising the quality of **digital education and digital aspects in Youth**
- Acts as an **evidence-based** knowledge hub in the field of digital Education and Youth
- Channels knowledge in the area of its mandate into programme and policy development
- Works **cross-sectorally** with all 54 National Agencies in 33 countries

What is an Education Ecosystem?

Ecosystem

Interactions between living things and their environment.

How different components interact within a learning environment?

Why Digital Education Ecosystem?

A Change in Society

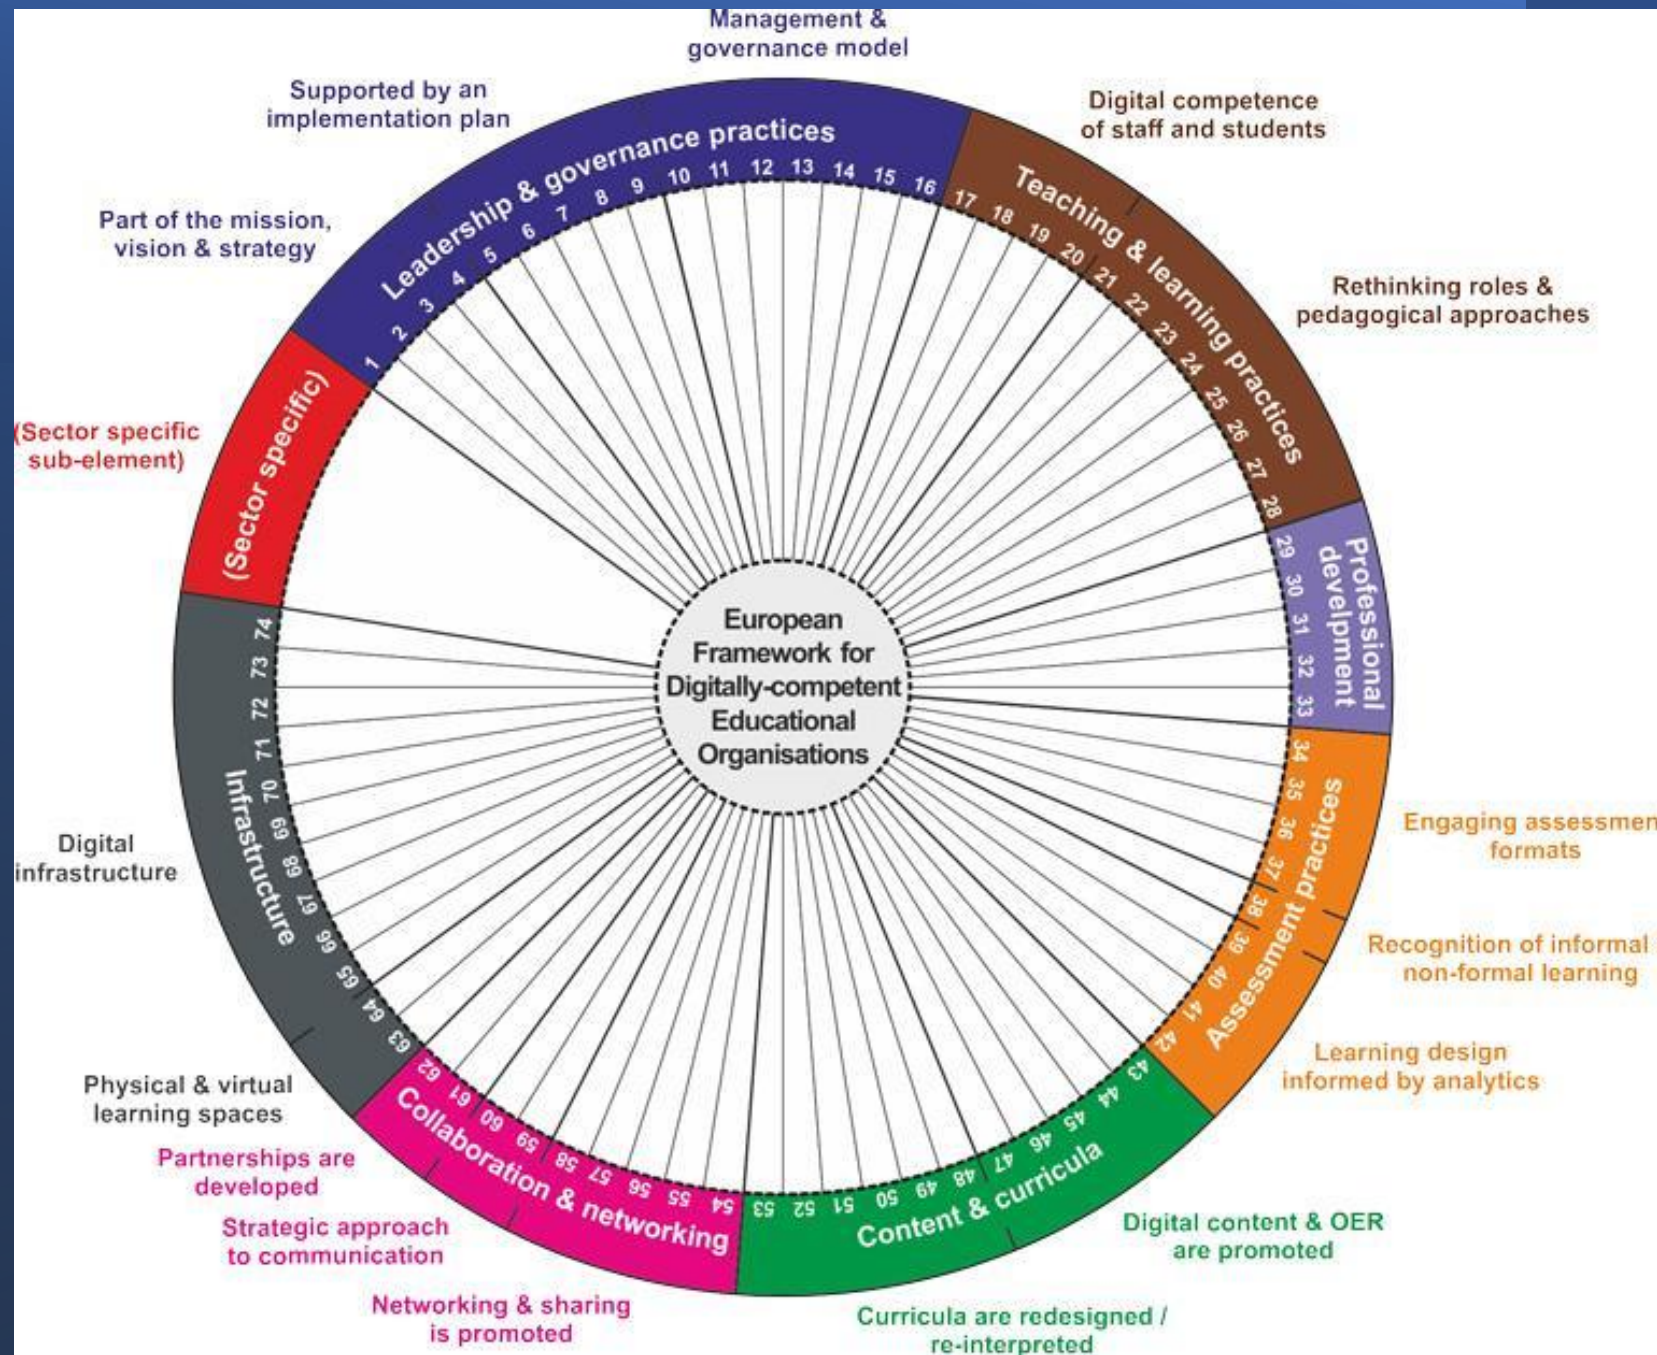

Yesterday	Today	Tomorrow
Memorizing	Knowledge construction	<i>Creation with AI?</i>
Content	Skills (21 st century skills)	<i>Future skills?</i>
Information search	Information processing	<i>Conclusions?</i>
Routine cognitions	Higher level cognitions	<i>Hybrid cognitions?</i>
<i>Calculation</i>	<i>Computational thinking</i>	<i>AI thinking?</i>

From a Device to Digitalization

Level	Focus	Outcomes
Digitalization (DIGI)	<ul style="list-style-type: none">-Systemic change (system thinking)-Operational culture-Leadership	<i>Enabling new processes, that create added value</i> → Enabling totally new functions and activities
Information technology (IT)	<ul style="list-style-type: none">-Computational information processing (computing)-Processes-Automation	<i>Automation of processes and information processing</i> → Making existing functions and activities more effective
Computers and technical devices (Hard ware, devices)	<ul style="list-style-type: none">-Hard ware, devices-Procurements	<i>"Pressing buttons", usually just manual information processing (vs electric typewriter)</i> → Using another tool for existing functions and activities

From a Device to Digitalization

Level	Focus	Outcomes
Digitalization (DIGI) Artificial Intelligence	-Systemic change (system thinking) -Leadership	<i>Enabling new processes, that create added value</i> → Enabling totally new functions and activities
Information technology (IT)	-Computational information processing (computing) -Processes -Automation	<i>Automation of processes and information processing</i> → Making existing functions and activities more effective
Computers and technical devices (Hard ware, devices) Digital Plumbing	-Hard ware, devices -Procurements	<i>"Pressing buttons", usually just manual information processing (vs electric typewriter)</i> → Using another tool for existing functions and activities

Digital Education Ecosystem

Educational Ecosystems consist of

- Educators
- Learners
- Learning materials
- Learning environments
- Tools and technology
- Pedagogy (learning and teaching methods)
- Curriculum, competencies & skills
- School leaders
- Operating culture, strategy, vision, policies
- Parents, educational stakeholders, community-members, companies, educational policy makers etc.
- Other school staff

Digital Education Ecosystem

Educational Ecosystems consist of

- Educators
- Learners
- Learning materials
- Learning environments
- Tools and technology
- Pedagogy (learning and teaching methods)
- Curriculum, competencies & skills
- School leaders
- Operating culture, strategy, vision, policies
- Parents, educational stakeholders, community-members, companies, educational policy makers etc.
- Other school staff

***Interaction between the components
of the digital education ecosystem!***

Digital Education Ecosystem

Operating culture,
strategy, vision,
policies

Educators

Learning environments

Tools and technology

Learners

Learning materials

Pedagogy
(learning and teaching methods)

School leaders

Curriculum,
competencies
& skills

Digital Education Ecosystem

Educators

Learning environments

Tools and technology

Learning materials

**Pedagogy
(learning and teaching methods)**

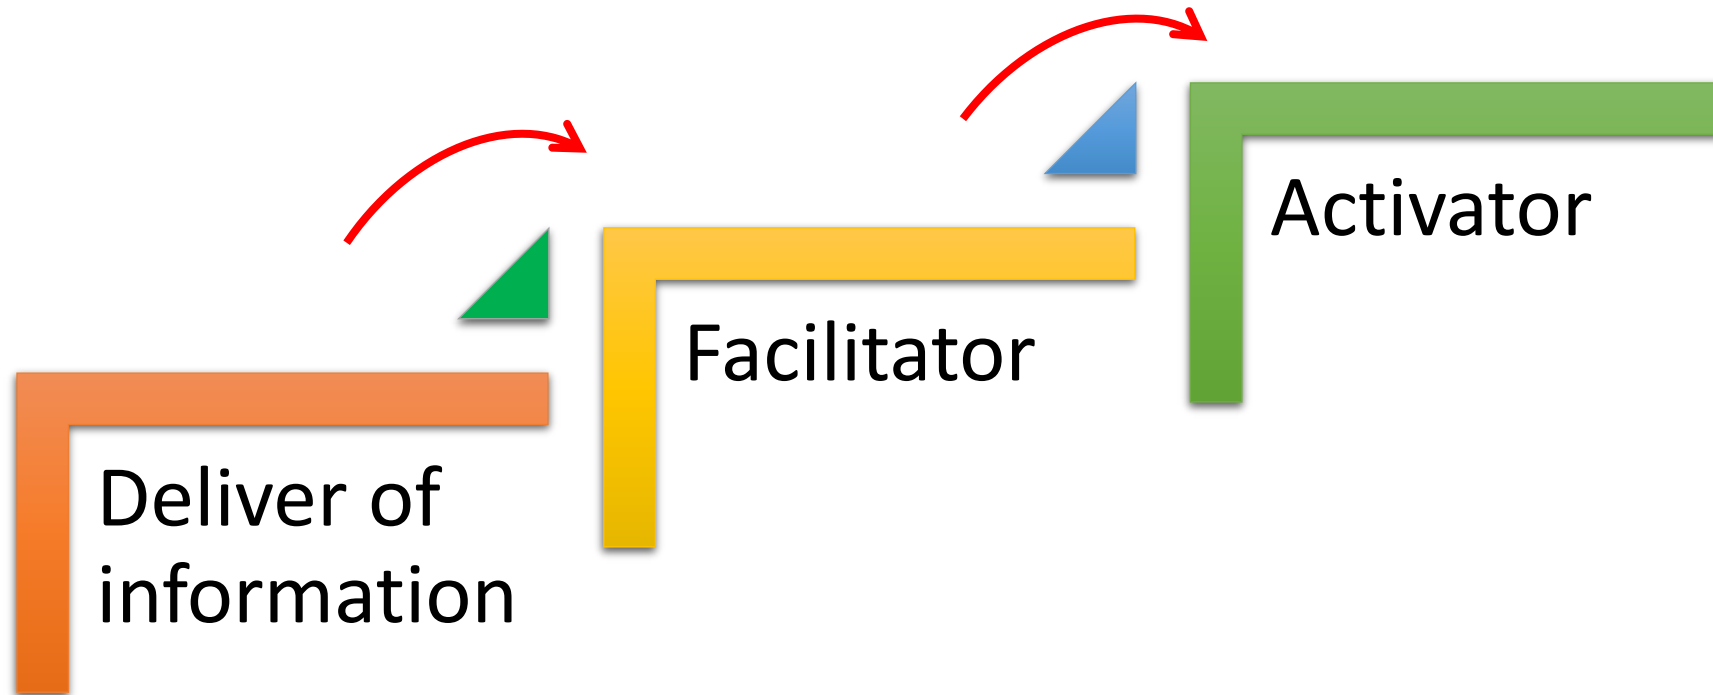

Learners

**Curriculum,
competencies
& skills**

School leaders

**Operating culture,
strategy, vision,
policies**

Transition in a Teacher's role:

Digital Education Ecosystem

Learners

Educators

Learning environments

Tools and technology

Learning materials

**Pedagogy
(learning and teaching methods)**

**Curriculum,
competencies
& skills**

School leaders

**Operating culture,
strategy, vision,
policies**

Teaching vs. learning

- Learning is not a direct reflection or a result of teaching!
- Students learn only by **processing information** by themselves
 - *Traditional teaching methods like lectures do not support optimally students' information processing (one's own thinking, problem solving, reasoning etc.)*

→ Something else is needed!

Digital Education Ecosystem

Operating culture,
strategy, vision,
policies

Educators

Learning
environments

Tools and
technology

Learners

Learning
materials

Pedagogy
(learning and
teaching
methods)

School
leaders

Curriculum,
competencies
& skills

A Change in Learning

	Surface Learning	Deep Learning	21 st Century Learning
<i>Goal:</i>	Recalling facts	Understanding	To create new solutions
<i>Outcome:</i>	Capability to apply information only in narrow context, if at all	Capability to apply knowledge in various situations	Capability to create new solutions for various situations
<i>Methods:</i>	Delivering information, repetition of information	Collaborative knowledge building	Co-Creation, Co-innovation
<i>Focus:</i>	Facts	Knowledge	Thinking strategies and thinking skills

Digital Education Ecosystem

Operating culture,
strategy, vision,
policies

Learning
environments

Tools and
technology

Learning
materials

Learners

Pedagogy
(learning and
teaching
methods)

School
leaders

Curriculum,
competencies
& skills

Digital Learning Environment

The role of the digital technology in learning and teaching?

- **Media** (information delivery)
- **Information resource** (information acquisition)
- **Communication**
- Tool for **content creation**
- Too for **publishing** own ideas, pics etc.
- Tool for presenting and **developing one's own (conceptual) artifacts**
- **Collaboration** / Knowledge Building
- **Thinking tool** (Cognitive tools)
- **Simulating**, modelling

Digital Education Ecosystem

environments

Tools and
technology

Learners

Learning
materials

Pedagogy
(learning and
teaching
methods)

School
leaders

Curriculum,
competencies
& skills

...

Map your institution's digital education ecosystem

1. Identify the main components of your institution's digital education ecosystem (individually)

2. Discussion on the table what are the common components of the digital education ecosystems? (draw on the flip paper)

3. Try to identify and label the interactions between the key components of the ecosystem (draw on the flip paper)

Digital Education Ecosystem

Operating culture,
strategy, vision,
policies

Educators

Learning
environments

Tools and
technology

Learners

Learning
materials

Pedagogy
(learning and
teaching
methods)

School
leaders

Transforming Digital Education Ecosystem – Systemic Change

Transforming Digital Education Ecosystem – Systemic Change

- *Vision*
- *Capacity building*
- *Pedagogical leadership*
- *Research*

- *Dynamic curriculum*
- *Competencies*
- *+21st century skills*

- *Phenomenon based learning*
- *Multiprofessional teams*
- *New assessment*

- *Physical learning environments*
- *Virtual learning environments*
- *Digital tools*

Thank you!
