

- I work within the Innovation Programmes of Foreign Languages at the Catalan Ministry of Education. Our Ministry obtained an Erasmus+ accreditation in 2021, and since then we have been supporting public schools in developing Erasmus+ projects and facilitating mobilities across Europe. The consortium is structured into different teams; I coordinate the team related to foreign language learning and currently support five primary and secondary schools participating in our programmes.

- At the moment, we are particularly interested in job shadowing mobilities, both for teachers from these schools and for us as educational consultants. In particular, we would be interested in observing how orality and speaking skills are addressed in pre-primary, primary and secondary education, learning more about your approaches to co-teaching in the classroom, and exploring how foreign languages are taught in your context. In addition, we are also open to exploring the possibility of group student mobilities; at the moment, we are managing student mobilities for next spring to Portugal and Belgium.

- On our side, we would be very happy to host students, teachers, educational advisors or inspectors in our schools, and to share how our programmes are implemented and managed.

Please do not hesitate to contact me if you need any further information.
Thank you again for your interest and openness to collaboration.
